

## THE VOLCANO HOUSE.

## Sulphur Steam Baths as a Specific For Rheumatism.

Mr. R. Wesmann has for nine months been an inmate of the Queen's Hospital, a cripple from inflammatory rheumatism.

By the advice of friends, two weeks ago, he went to the Volcano House to try the sulphur baths for a month. By the last steamer he wrote to a friend as follows:

VOLCANO HOUSE, HAWAII,  
November 10, 1891.

Having now been here eleven days, during which time I have taken one sulphur bath daily, sometimes, on very fine days, two, I have had occasion to give the baths a fair trial, and it is with the greatest pleasure I now take the liberty of informing you that I have already derived a wonderful benefit from the baths. I feel altogether like a new being and the rheumatism is gradually disappearing, the joints are much more nimble and the swelling gone considerably down. The principal part where the malady is centered now is round the ankles, but I have no doubt this will also be cured in time by the baths. These latter are arranged very nicely, so that the bather, when sitting in the box, can himself regulate the amount of steam he wishes. In the same room there are hot and cold water-pipes leading to the same shower, so the temperature of the water can also be regulated according to the taste of the bather.

There can be no doubt about these sulphur-vapor baths being an excellent thing, and if anything will drive rheumatism out of the system they ought to do it. Nearly everybody who has been up here since I came has tried them and pronounced them to be splendid.

I have the best of hopes that I will entirely recover my good health here by the time the month has expired.

I have been very fortunate in every respect; the trip with the Hall was quite an enjoyment, the weather being fine all the way and everybody on board very obliging and kind to me. After being landed at Punaluu on Thursday about 5 A. M., we took our breakfast at the hotel, and proceeded by rail to Pahala; there we got into a comfortable coach, which brought us to the Halfway House (thirteen miles from the Volcano House) at 11:30 A. M. Here we partook of a very nice dinner, and then continued on our journey in the same coach, which finally brought us to the Volcano House at 5 P. M., where an excellent supper was ready for us; I did not feel the least inconvenience the whole journey, and everything was beyond my expectation.

The climate here, although a good deal colder than in Honolulu—from 60 to 75—and with frequent small showers, seems to agree well with me. I sleep well at nights and have a good appetite; but it is not always raining here, we have had since I came, five splendid days, the sun shining all the time from morn till night—days not to be seen in Honolulu.

The indigestion, which always troubled me more or less while in the hospital, I have now more signs of now, and I eat whatever is on the table. Mr. Lee with family are exceedingly kind to me, and if I was one of their own they could not possibly treat me better; I have every comfort that an invalid could wish for. A fine log-fire is kept burning in the sitting room all day, and the table is equal to any first-class hotel.

R. WESMANN.

## THE PHONOGRAPH.

## Her Majesty the Queen Speaks Into It.

Through the kindness of Mr. C. Stoeckle, the owner of the phonograph, a reporter of the Advertiser was allowed to hear Her Majesty's record on the phonograph, that was taken Monday as mentioned in this journal. Consul-General Allen's record was also heard. The following is Consul-General Allen's greeting to the Queen:

TO HER MAJESTY LILIUOKALANI OF THE HAWAIIAN ISLANDS:—Please to accept my congratulation on the introduction of Edison's phonograph into the Kingdom of Hawaii. Please Your Majesty to continue to enjoy excellent health, and your people the good will of our nation.

I have the honor to be your most obedient servant,  
ELLIS H. ALLEN,  
Consul-General of Hawaii.

## Her Majesty spoke as follows:

OWAI KEIA O LILIUOKALANI—O keia la 16 o Noemapa, M. H. 1891, keia la hanau o ka Mo'i Kalakaua. Ua haawi mai o Mr. Stoeckle i kona lokomaikai piha e ae ia'u a me ko'u mau haunaele eae, a me na Keikialii Kawanakoa a me Kalaniana'ole, a me na lede a me na keoninane e ne e hoohole i na mea maikai o puka mai ana mai keia ponoponapa (phonograph) mai. He la keia e hoopuina oleia ai i hoko o na puu wai o na Hawaii pono i pau. He la keia e hoopuina ana i na puu wai o na mea pa'u i ke aloha no ko la-kou Mo'i Kalakaua i hala. Aole e pau ana ko makou hoomanu ana i na mea i loheia mai keia ponoponapa mai. Ua oia aku ka nani o keia mea maikai manana o ka makou i loheia mai manana, a me na mea maikai i hoo-pukaia o Hon. Mr. Allen o New York. Pela i hoikeia ai ka maikai o keia mekini. Aloha oukou.

(Translation.) To-day, the 16th day of November, A. D. 1891, is the birthday anniversary of King Kalakaua. Mr. Stoeckle has kindly extended a most courteous invitation to myself and my companions; also Princes Kawanakoa and Kalaniana'ole, and the ladies and several gentlemen, to listen to the delightful things (tunes) coming out from this phonograph. Every patriotic Hawaiian can never forget the memory of this day. This is the only day that will produce (devotion) for Kalakaua, their beloved sovereign. We shall long remember what we have heard from this phonograph to-day. This wonderful instrument excels in clearness the one which we had lis-

tened to before. The words and the kindly expressions of Hon. Mr. Allen of New York are produced with perfect distinctness. Such are the delightful qualities possessed by this machine. Aloha oukou (my love to you).

## PRESIDENT HARRISON AND THE PONAPE TROUBLES.

A Washington correspondent of the Springfield Republican says that President Harrison is taking hold of the Ponaape matter with more energy than Secretary Blaine has thus far shown. The claim for remuneration and restoration on behalf of the American missionaries has been presented to the Spanish Minister-Resident. Secretary Blaine had a reason for inaction in the difficulty of establishing communication with the Caroline Islands. No report has been received at the State Department from the United States Consul appointed last December. The President is willing to go ahead, however, without waiting for further details of the outrages, and the Spanish Minister has accordingly received the demand for indemnity to be forwarded to Madrid. The first point to be carried, diplomatically, is to secure from the Spanish Government an acknowledgment of the liability involved. The American missionaries had from the Spanish Government an express promise of protection, given in a note to Secretary Bayard, March 12, 1886. Mr. Bayard was led to raise the question at that time by the dispute between Germany and Spain in regard to jurisdiction over the Caroline Islands, settled by the Pope in favor of Spain. The present relations of the United States with Spain are so friendly that those interested in the matter are hopeful that justice will be done, and suitable indemnity and apology made for the outrages of the Spanish colonial officials on the property and good name of the American missionaries. The American Board, at its annual meeting in Pittsfield, last month, appointed a special committee to go on to Washington and push the matter with all energy.

## From the Hilo Record.

On November 5th, the brig Lur-line, Matson, master, sailed for San Francisco. Passengers: Mrs. Matson, daughter and nurse, Mr. Low.

The reflection from the volcano has been very bright for the last week. Report says the crater is very active.

Mr. J. P. Sisson has accepted the position of Police Justice during Judge Hapai's absence. A number of gambling and opium cases were tried before him yesterday.

Quite extensive repairs are being done on the church of the Catholic Mission.

The thunder-storm of last Sunday did not reach our town, but it was quite severe around the volcano, cutting off all telephonic communication in that direction.

Messrs. Baldwin and Chamberlain are locating the Volcano road, from the Waialea mill, so as to get its true position on the maps.

Hilo, Nov. 10.

## South Sea Island Energy.

The following clipping is from an Eastern paper. If we do not commence doing something for the World's Columbian Exposition our distant neighbors might eclipse us:

"A South Sea court for the Exposition at Chicago is proposed by William E. Giles, who would like to be appointed Commissioner of the Exposition to the South Sea Islands. Mr. Giles estimates the expense of bringing over ten natives at \$1000. He suggests that the brass band of the King of Troja be secured."

## THE H. G. JOHNSON.

## A Collision With the Merritt Obligated Her To Make Boston For Repairs.

The American bark H. G. Johnson, Captain Isaac N. Colby, arrived in port on Monday morning, November 16, 144 days from Boston and 169 days out from New York. The Johnson left New York on May 30 for Honolulu, having on board about thirteen hundred tons of general merchandise, including 10,000 cases of kerosene oil, a locomotive, boiler, and iron rails. The agents of the vessel here are Messrs. Castle & Cooke.

On the night of June 1, in a dense fog, the Johnson collided with the barkentine Merritt, of St. John's. The Johnson lost all her head gear, and, being thus disabled, the captain decided to make for the nearest available port, which was Boston, for repairs, arriving there on June 5. About three hundred tons of her cargo were taken out in order to effect the necessary repairs. On the 25th of June the vessel proceeded on her voyage for Honolulu, and passed the equator 23 days out. On the 6th day out she passed Cape Horn. There the usual heavy weather was experienced. She made the run from 50 to 50 in 28 days. Had moderate S. E. and N. E. trades in the Pacific, with fine weather. Crossed the equator on October 25.

Passed the American schooner Anna, 23 days from San Francisco off Maui on Sunday morning, heading for Kahului, minus her bowsprit and jib-boom, and carrying a temporary outfit.

Rev. and Mrs. F. D. Greely and son were passengers by the Johnson from Boston. Mr. Greely sought the ocean voyage on account of his health, and he has certainly been benefited by it. Mr. Greely and family will return by the same vessel.

The H. G. Johnson is discharging near the P. M. S. S. Co.'s wharf.

## EVERYBODY EATS CRACKERS.

Everybody eats crackers and consequently anything relating to their manufacture and sale is of general interest. There was a time in the history of the business when crackers were all about the same. One brand was just about as good as another and none of them were good enough to be any great temptation to a delicate stomach. That time has passed. It was a good many years ago. The crackers of the present generation are as different as day from night. There are good crackers and bad crackers; fresh crackers and stale crackers; and of the whole lot, stale crackers are the worst.

There are some grocers in the country who sell stale, unpalatable crackers because they can get them cheap and make a big profit on them. They think their customers don't know the difference and by and by, when their cracker trade is all gone, and they don't sell a box in a week, they look surprised and say: "Funny how people's tastes change. People don't care for crackers any more."

Don't they though? People don't care for stale, unwholesome crackers, that's true, but they do care for a cracker that is pure and fresh, and altogether delightful as an article of food.

## The American Biscuit Co.

has a manufacturing capacity of 800 barrels of flour daily. This enormous quantity it makes into a greater variety of goods than any other bakery in the United States of America, and yet is scarcely able to fill its orders. It is turning out more crackers to-day than it ever did before, and the trade is still growing. Why is it? It is simple enough. Their crackers are the best that are made. People who try them invariably want them again and the grocer who sells them always finds that they not only prove a good source of revenue to him, but make his store popular with the people.

## American Crackers

are made by skilled bakers, of the very purest and best materials obtainable. They are sent out of the factory fresh from the ovens, and are never rendered unwholesome and unpalatable as well by being stored in a warehouse a month or two waiting for orders. The orders are always waiting for the crackers. Always ask for
